**PUBLIC NOTICE**

The Illinois Environmental Protection Agency (IEPA) and the United States Environmental Protection Agency (U.S. EPA) hereby give notice of intent to issue joint a Resource Conservation and Recovery Act (RCRA)/Hazardous and Solid Waste Amendments (HSWA) permit to AT&T Bell Laboratories at the intersection of Warrenville Road and North Naperville Road in Naperville, Illinois. The facility's mailing address is 2000 North Naperville Road, Naperville, Illinois, 60566. AT&T is currently operating under interim status as provided for in Section 3005 of RCRA. This joint permit would allow AT&T to store waste laboratory chemicals, waste plating solutions, spent solvents and acid waste. Interested citizens are invited to review copies of the permit application, draft permit and related fact sheets at the following locations:

Nichols Library  
 200 W. Jefferson Ave.  
 Naperville, Illinois 60566  
 708/355-1585

Lisle Public Library  
 777 Front St.  
 Lisle, Illinois 60532  
 708/971-1675

Interested citizens may submit written comments on the permit documents to the Public Involvement Coordinator at IEPA (listed below) by August 14, 1990. The Agency also welcomes any information from the public that describes any past contaminant releases from the facility.

In response to public requests or at the discretion of IEPA or U.S. EPA, a public hearing can be held to clarify one or more issues concerning the draft permit. A request for a public hearing must be made in writing and must state the nature of the issue to be raised at the hearing. Written requests should be sent to the IEPA Public Involvement Coordinator listed below. Public notice will be issued 45 days before any hearing.

All comments submitted will become part of the Administrative Record and will be evaluated by IEPA and U.S. EPA in making the final permit decision. The two agencies will respond to comments on the draft permit, specify which provisions, if any, of the final permit may have been changed and indicate whether additional documents have been included in the Administrative Record. Anyone who submits written comments will be notified of the final permit decision and the permit appeal process.

The permit application, draft permit, related information and all data submitted by the applicant, as part of the Administrative Record, are now available for public inspection Monday through Friday between 9:00 a.m. and 5:00 p.m. at the following locations:

**State Portion**  
 Illinois EPA  
 Government & Community Affairs  
 Attn: Kerl Luly  
 Public Involvement Coordinator  
 2200 Churchill road  
 Springfield, Illinois 62794-9276

Please telephone ahead for an appointment to view the documents.

The IEPA Division of Land Pollution Control is authorized to administer the RCRA program and as of April 30, 1990, specific provisions of HSWA (amending RCRA) which address corrective actions waste minimization, mixed wastes and other regulatory functions. HSWA requires facilities seeking a permit to take corrective actions for any releases of hazardous constituents from the facility. New requirements of HSWA (eg. land disposal restrictions) must be addressed by U.S. EPA. For further clarification of program authority, refer to the March 1, 1990 Federal Register, Vol. 55 No. 41 pp. 7220

**CHEAP LAND...**

Dutch explorer Peter Minuit landed on Manhattan Island in 1626. He later bought it from Indians for \$24 worth of trinkets.

...by its  
 "Dragon  
 name is  
 d.  
 \$25 million in  
 ve notes from  
 Preserve Commis-  
 penalty for years of  
 trespass and fraud,  
 d.

Recalling his former days as an excavator and farmer, Leverenz stated "I worked honestly all my life. Than I ran up against a bunch of criminals. I didn't know which way to turn until the last six years when I began to learn common law."

And what will he do if the Commission pays the \$25 million? "I'll shut up and leave them alone," he laughed.

Soden said he warned Leverenz that going onto the Dragon Lake property could result in citation and arrest. "But he's plowing onward. He's diligent in his efforts," Soden remarked.

## PARK DISTRICT SOFTBALL

Dr. Tripps Troop have been taking just what the point in the regular season which marked the halfway the six-day "Ribfest" break, Eagle II on the brink of play-off extinction.

A 12-3 victory by Whirlpool washed out any playoff hopes for White Eagle/Macrom, as Whirlpool remains three games behind the league leaders. Whirlpool and The Troop will meet at the end of the month to possibly determine the top seed in the league playoff tournament.

## PARK DISTRICT

## MEN'S 12" REC SOFTBALL

Weeks atop the very competitive Mens 16" Recreation League. They lit up the scoreboard when they handed Fluid Air a deflating 28-0 loss. Dan Mueller was the main feature as he punched out two homers, his second one leading off the nine-run fourth with a bang. Naper Auto seems to be back on track with its second win in a row after falling an upset victim to fourth place Cor s Pizza/Fair Oaks

Ford three weeks ago, the loss put White Eagle II on the brink of play-off extinction.

# Bell Labs applies for waste permit

by Laura Gallo

In an effort to meet federally imposed deadlines, AT&T Bell Laboratories in Naperville has petitioned both the Illinois and U.S. Environmental Protection Agencies (EPA) for a permit to allow the company to continue storing used laboratory chemicals on site.

Both the U.S. and Illinois EPAs are now in the process of determining whether AT&T Bell Labs meets the necessary permit requirements to continue this storage, said George Hamper, chief of Illinois' Resource Conservation and Recovery Act permitting section for the U.S. EPA.

Hamper said on Friday that Bell Lab's permit application is among approximately 50 others in Illinois that must be either granted or denied by the Environmental Protection Agencies by the end of 1992.

The U.S. Hazardous and Waste Amendments of 1980 required that all storage and treatment facilities apply for waste storage permits by Nov. 8 of 1988 and that all permit requests be acted upon by Nov. 8 of 1992.

In the meantime, Bell Labs — like other storage facilities who have applied for the permits — has been operating since 1984 under an "interim status."

This, in effect, allows the facility to continue storing the used laboratory chemicals, waste plating solutions, spent solvents and acid waste on its site, provided that it follows certain guidelines, Hamper reported.

He explained that if the

state and federal agencies agree to grant a permit to Bell Labs, the company would be allowed to continue this storage, provided it abides by stringent requirements set out in the permit.

Both the Illinois and U.S. EPAs have already set up a draft permit for the Naperville company which is located at the intersection of Warrenville road and north Naperville road.

A public notice issued by the Illinois EPA on June 29 reports that copies of Bell Lab's permit application and the EPAs' draft permit are now available for citizen review at the Nichols Library at 200 W. Jefferson ave. and the Lisle Public Library on 777 Front st.

The notice states that interested residents may submit written comments on the matter to Keri Luly, public involvement coordinator of the Illinois EPA.

The address at which to send these comments to Ms. Luly is 2200 Churchill rd., Springfield, Ill. 62794.

According to the notice, the EPA welcomes any information from the public that describes any past contaminant released from the facility.

Carl Blesch, Bell Labs public relations representative, said Bell Labs operates both a printed circuits shop and a thin film shop. Both of these, he explained, help to create prototypes of integrated circuits and circuit boards, and

ultimately result in the production of hazardous waste.

Paul Wyszowski, director of Bell Labs' environmental department, said this material is kept on site for a minimal amount of time ranging from 3 months to one year. It is then removed by contractors for either incineration or treatment.

Bell Labs is currently contracted with Envirote of Harvey to treat all of its dilute water base waste, while Waste Management of Calumet disposes of all its other use chemical substances.

Depending on the type of material, the waste is temporarily stored on site in either a 6,000-gallon underground steel tank enclosed in a concrete chamber or a facility

remote to the main employee building.

Wyszowski said chemicals composed of a dilute water base are stored in Bell Labs' steel tank, while other miscellaneous research chemicals are stored in the separate building. Most of these chemicals are segregated from one another and are stored in either their original containers or in 55-gallon drums.

On the average, Wyszowski said Bell Labs produces approximately 5,000 gallons of dilute water base waste during a six-month period. Moreover, he said, less than 550 gallons of all other chemical materials is produced in that same period of time.

According to Hamper, companies who hope to receive storage permits from the EPA must meet operation requirements relative to personnel training, waste disposal and site inspection.

However, Wyszowski said that this procedure is only a formalization of what Bell Labs has been doing all along. Bell Labs has been storing waste on site since the beginning of its operations here in Naperville in 1966.

"This is not a new operation," Wyszowski said. "We been storing this material on site since the building's existence. The permit process itself is just more of a formalization of what we have been doing already."

June 27, 1990

The Honorable Mary Lou Cowlshaw  
Illinois State Representative  
552 South Washington Street, Room 119  
Naperville, Illinois 60540

Dear Representative Cowlshaw:

The enclosed material refers to the Resource Conservation and Recovery Act (RCRA) and Hazardous and Solid Waste Amendments (HSWA) permit applied for by AT&T Bell Laboratories in Naperville, Illinois. Public information repositories have been established at the Nichols Library in Naperville and Lisle Public Library in Lisle, Illinois, so that interested citizens can review the facility's permit application and the IEPA's draft permit. The Illinois Environmental Protection Agency (IEPA) is accepting public comments on the draft permit until August 14, 1990 for consideration prior to writing the final RCRA/HSWA permit. The enclosed public notice will appear June 29, July 6 and July 13 in the Naperville Sun.

If you have any questions, please call me at 217-782-3397.

Sincerely,

A handwritten signature in cursive script that reads "Bruce".
